- March 2005, AfriNIC presents an updated application demonstrating that the transition plan is nearing completion

- March 2005, public comment forum opened:
  - 20+ comments, all but one positive about AfriNIC's success

ICANN

AfriNIC status

- IANA Report on AfriNIC finds:

  AfriNIC has met all of the conditions specified in ICP-2. AfriNIC's operations, policies, and bottom-up self-governance structure comply fully with the specified guidelines. AfriNIC's technical operations and expertise are impressive. The transition plan has been satisfactorily executed and is virtually complete. AfriNIC's cooperation with the incumbent RIRs has been exemplary, and the NRO has given its full endorsement to approval and recognition of AfriNIC as an independent RIR.

  Accordingly, the IANA concludes that AfriNIC has met all the necessary requirements for approval and recognition.
