Re: Registry Request #2011005, Third Level Domain DNS Support for .coop

Dear Ms. Hoover,

ICANN has conducted a preliminary review of DotCooperation LLC's request for Third Level Domain DNS Support for .coop, in accordance with the Registry Services Evaluation Policy and process set forth at <http://www.icann.org/registries/rsep/rsep.html>.

Based on the information provided, ICANN's preliminary review did not identify any significant competition, security or stability issues. As noted in the proposal, implementation requires a modification to the .coop Registry-Registrar Agreement(RRA). We are considering your proposed modifications and will be in touch with you shortly for reaching agreement on an appropriate amendment.

Please let us know if you have any questions.

Best regards,

Karla Valente
