Subject: WS2-IT - Offer to continue during Implementation.

Maarten Botterman, Chair ICANN Board
Avri Doria, Board Liaison to WS2-IT
Theresa Swineheart, Senior Vice President, Multistakeholder Strategy and Strategic Initiatives

Maarten,

First, we would like to note our appreciation for the Board having approved all the CCWG-Accountability WS2 recommendations at its ICANN 66 meeting in Montreal.

Given these recommendations will now proceed to implementation the WS2 Implementation Team (WS2-IT) would be open to continuing its work advising ICANN Org. as required during the implementation phase.

This would be in line with the current practice for the implementation of other review team recommendations.

Please advise if the Board would consider this advantageous for the implementation of the WS2 recommendations.

Thanking you for your support

The CCWG-Accountability Co-Chairs
Tijani, Jordan and Thomas.
