

Nom Com appointee specific requirements for the ccNSO Council

Introduction

During the Toronto meeting the chair of the NomCom wanted ccNSO Council input on additional requirements from a ccNSO perspective for appointing NomCom appointees to the Council and the Board. The proposed additional requirements are:

Appointment of ccNSO Councillors

The ccNSO Council is currently made up by 15 Councillors appointed by the ccNSO membership (3 from each ICANN Geographic Region) and 3 by the Nominating Committee. Further the ccTLD Regional Organisations (AFTLD, APTLD, CENTR and LACTLD) have all appointed an observer to the Council. To maintain the current balance the ccNSO Council strongly advises the Nominating Committee not to appoint members who are directly or indirectly associated with a ccTLD manager (either as a Board member, employee or advisor) nor Board member or employee of a Regional Organisation. Further the Nomcom is advised that the candidate should be able to commit sufficient time to the work of the ccNSO.

Appointment of ICANN Board members

With regard to the appointment of the appointment of NomCom appointed Board members, the ccNSO has no specific additional advice. From a ccNSO Council perspective there is no need to exclude candidates who are associated with a ccTLD, as a Board member, employee or advisor, or associated with a ccTLD Regional Organisation.
