

# Plan of Action to Implement *Temporary Specification for gTLD Registration Data*

ICANN consults with Article 29 Working Party. ICANN Board consults with governments on advice provided per ICANN Bylaws, and the ICANN community on the *Temporary Specification*.

 GNSO Policy Development Process

 *Temporary Specification* Effective

 Uniform Access Model Development and Implementation

25 May 2018

Every 90 days, ICANN Board must reaffirm *Temporary Specification*.

25 May 2019

17 May 2018  
ICANN Board resolves to adopt *Temporary Specification for gTLD Registration Data*.

July 2018  
RDAP Profile(s)  
Completed \*

December 2018  
RDAP Implementation  
Completed

ICANN Board urges the community to consider implementation items, including accreditation and access model, anonymized email format, distinguishing between legal and natural persons, and other items included in the Annex to the *Temporary Specification*.

**GAC:** Governmental Advisory Committee

**gTLD:** generic top-level domain

**GNSO:** Generic Names Supporting Organization

**RDAP:** Registration Directory Access Protocol

\* **RDAP** enables users to access current registration data. It was created as an eventual replacement for the WHOIS protocol. RDAP provides for layered access to registration data.
