

Dear MoSAPI user,

Please be aware that a minor version upgrade of the Monitoring System API (MoSAPI) is expected to be released on 26 August 2021.

This release will fix a bug in the “result” element of the measurement payload that incorrectly shows the value as a JSON number for some instances and a JSON string for others when the value shall always be a JSON string as defined in section 5.8 of the [MoSAPI Specification](#).

An upcoming [MoSAPI specification](#) document with minor editorial corrections has also been published in the [Monitoring System API Specification](#) webpage.

For any questions, please contact [ICANN Global Support](#).

Best regards,
