## 1 Accredited Registrar Status

Table 1 displays the current number and status of the ICANN accredited registrars. The registrars are grouped into three categories:

- **Operational registrars:** Those who have authorized access into the Sponsor’s registry system for processing domain name registrations.
- **Registrars in the Ramp-up Period:** Those who have received a password to access the dotCoop operational test and evaluation (OT&E) environment. The OT&E environment is provided to allow registrars to develop and test their systems with the dotCoop LLC registry system.
- **Registrars in the Pre-Ramp-up Period:** Those who have been sent information by dotCoop, but have not yet executed the Registry Confidentiality Agreement and/or have not yet submitted a completed Registrar Information Sheet.

| Status                           | # of Registrars |

### 3 gTLD Zone File Access Activity

Table 4 summarizes the zone file access activity for June. As required by the ICANN/dotCoop Registry Agreements, the dotCoop Registry provides third parties bulk access to the zone files for the .coop TLD.

|   | #  |
|---|----|
| <b>New zone file access passwords</b>                             | 0  |
| <b>Total zone file access approvals at end of reporting month</b> | 59 |

Table 4 : gTLD Zone File Activity

### 4 Completed Software Releases

In June the registry had no software releases. There was an upgrade to the backend databases which happened without incident.

### 5 Whois service activity

Table 5 shows the number of queries sent to the registry whois servers in June. It counts only the external hits on the servers and does not include test and monitoring hits. The WHOIS figure is down as we have implemented a system to prevent over use of the WHOIS servers by bots. Currently there is now a limit of 10000 look ups a day from any one IP address. There were 2 specific IP addresses that were performing over 95% of the lookups. Should an IP over use the WHOIS server a response asking them to contact us is returned so that we can either up the limit for their IP address or offer them access to the daily zone file which might be of more use to them.

| Month | Total  |
|-------|--------|
| June  | 551702 |

Table 5 : Total Monthly "Whois" Queries

### 6 Total Number of Transactions By Subcategory

Table 6 shows the total number of successful transactions during June for contacts, domains and name servers, split into the following subcategories: creates, deletes, updates, checks, renews, and transfers. The .coop registry does not support restore transactions and so they are not included here.

|                     | Creates | Deletes | Updates | Checks | Renews | Transfers |
|---------------------|---------|---------|---------|--------|--------|-----------|
| <b>Contacts</b>     | 116     | 0       | 84      | 41     | 0      | 0         |
| <b>Domains</b>      | 81      | 1       | 330     | 239526 | 187    | 1         |
