6. Concept: Mechanisms for Ensuring that all Registrars Are Treated Fairly

Annual Reports - No later than one month after each anniversary date after the Commencement-of-Service Date, GNR shall provide to ICANN a Fair-Treatment Report with the following elements:

6.1 A description of every known violation or alleged violation of the Code of Conduct during each calendar month ending in the year to which the report relates. (cc 2)

After reviewing records and discussions with staff of GNR, the Compliance Officer reasonably believes that there have been no violations of the Code of Conduct during the last years of operations. Additionally, there have been no allegations of violations of the Code of Conduct during the past year.

6.2 Total number of complaints received by GNR from registrars regarding services provided by GNR.

6.2.1 Identify and categorize the types of complaints received from registrars. (cc 2)

Categories and nature of complaints:

1. Complaints relating to the operation of defensive registrations. GNR received one complaint relating to two registrations with incorrect syntax entered by the Registrar and whether GNR could amend the defensive registration. As this was outside the contractual grace period this was refused in both cases.
2. Complaints relating to auth info codes required in order to effect transfers. GNR received 3 complaints from registrars who did not understand how to effect transfers. GNR now updates generic auth info codes to individual codes when proper authorisation has been received from the registrar in question. Transfers can then be effected.

6.2.2 List corrective actions, if any, in response to the categorized complaints. (cc 2)

See 6.2.1 above.

6.3 Total number of ICANN-Accredited Registrars restricted from further registrations for non-payment of registration fees. (cc 3)

0.

7. Concept: Use of Centralized Registry-Level Whois to Enhance Transparency and Accountability in Domain-Name Registrations Annual Reports - No later than one month after each anniversary date after the Commencement-of-Service Date, GNR shall provide to ICANN a Whois Report with the following elements:

7.1 Total number of complaints received from registrants regarding Whois information during each calendar month ending in the year to which the report relates. (cc 3)

7.7.2 Identify and categorize types of privacy complaints. (cc 2)

All privacy complaints concerned the provision of registrant's information on the GNR WHOIS service. In all cases, registrants stated that they did not wish certain information such as phone numbers and addresses disclosed. In all cases registrants were referred to the contract they had signed with their sponsoring registrar which required the provision of such information. GNR was, however, mindful of the legal provisions applying to the GNR WHOIS database.
